Business Requirements Document (BRD)

Project Name: Project NOVA CART

1. Document Information

Item	Details
Project Name	Project NOVA CART
Document Type	Business Requirements Document (BRD)
Domain	DTC (Direct-to-Consumer) E-commerce
Version	1.0
Prepared By	Business Analysis Team
Stakeholders	Marketing, Sales, Operations, Finance, IT, Customer Support

2. Executive Summary

Project NOVA CART aims to design and implement a scalable Direct-to-Consumer (DTC) E-commerce platform enabling the brand to sell products directly to customers via website and mobile application. The system will eliminate third-party marketplace dependency and improve customer data ownership, profit margins, and personalized marketing capabilities.

3. Business Objectives

1. Increase direct sales revenue by 40% within Year 1.
2. Improve customer retention by 25%.
3. Reduce marketplace commission costs by 15%.
4. Achieve 99.9% platform uptime.
5. Enable personalized marketing using first-party customer data.

4. Business Problem Statement

Currently, the company relies heavily on third-party marketplaces. This results in:

- Reduced profit margins
- Limited customer data access
- Lack of personalized marketing
- Dependency on external fulfilment policies
- Brand dilution

A direct channel is required to gain full control over customer experience and business growth.

---

5. Scope of the Project

5.1 In-Scope

- Website & Mobile App development
- User Registration and Login
- Product Catalogue Management
- Shopping cart
- Check Out and Payments
- Order Management
- Returns and Refunds
- Inventory Integration
- CRM Integration
- Admin Panel
- Reporting and Analytics

5.2 Out of Scope

● Marketplace integrations (Amazon, Flipkart)

---

6. Stakeholder Identification

Stakeholder	Role	Interest
CEO	Sponsor	Revenue Growth
Marketing head	Business owner	Campaigns and promotions
Operations manager	Fulfilment	Order Processing
Finance	Payments	Reconciliation
IT team	Implementation	System build
Customer support	Service	Issue handling

---

7. High-Level Business Requirements

7.1 User Management

BR-UM-01 - Customer Registration

The system shall allow customers to register using:

- Email + OTP
- Mobile + OTP
- Social Login (Google / Apple)

BR-UM-02 - Customer Account Management

The system shall allow customers to:

- Manage profile

- Add multiple addresses
- Track orders
- View order history

7.2 Product Catalog Management

BR-PC-01 — Admin Product Management

The system shall allow admin users to:

- Create product categories & subcategories
- Add product variants (size, color)
- Upload images & videos
- Configure pricing & discounts

BR-PC-02 — Customer Catalog Browsing

Customers shall be able to:

- Filter by price, brand, size, rating
- Sort by popularity, price, newest
- View stock availability

7.3 Shopping Cart Management

BR-CART-01 — Shopping Cart Features

The system shall:

- Allow add/remove/update quantity
- Persist cart for logged-in users
- Show tax and shipping estimation

7.4 Checkout Process

BR-CHK-01 - Checkout Validation & Payment Preparation

The system shall:

- Validate inventory before payment
- Auto-calculate tax
- Apply promo codes
- Allow multiple payment options

BR-CHK-02 -Order Confirmation

The system shall generate:

- Order ID
- Confirmation email/SMS
- Invoice

7.5 Payment Management

BR-PAY-01 — Payment Gateway Integration

The system shall integrate with payment gateways to support:

- Credit/Debit Cards
- Net Banking
- UPI
- Wallets
- Buy Now Pay Later (BNPL), if applicable
- Credit/Debit Card
- UPI
- Net Banking
- Wallets

BR-PAY-02 — Payment Failure Handling

The system shall:

- Handle payment failures
- Implement retry logic
- Auto-refund for failed orders

7.6 Order Management System (OMS)

BR-OMS-01 — Order Processing

The system shall:

- Generate order status (Placed, Packed, Shipped, Delivered)
- Allow cancellation before shipping
- Enable return requests

BR-OMS-02 — Logistics Integration

The system shall integrate with logistics providers for:

- Shipment tracking
- Delivery confirmation

7.7 Returns & Refunds

BR-RR-01 — Return Requests

Customers shall be able to:

- Raise return request within the return window
- Select return reason
- Upload supporting images

BR-RR-02 — Refund Processing

Refunds shall:

- Be processed within **5–7 business days**
- Be credited via the **original payment method**

7.8 Inventory Management

BR-INV-01 — Inventory Operations

The system shall:

- Deduct inventory post successful payment
- Auto-update stock levels
- Trigger low-stock alerts

7.9 Admin Panel

BR-ADMIN-01 — Admin Capabilities

Admin users shall be able to:

- Add, edit, delete products
- Configure discount campaigns
- Manage users
- Approve returns
- View reports

7.10 Reporting & Analytics

BR-RPT-01 — Analytics Dashboard

The system shall provide dashboards for:

- Daily Sales
- Conversion Rate
- Cart Abandonment Rate
- Top-selling Products
- Customer Lifetime Value (CLV)

---

8. Functional Requirements

8.1 Search Functionality

The system shall provide:

- Auto-suggestions
- Typo tolerance
- Search analytics

8.2 Wishlist

The system shall allow customers to:

- Add/remove items
- Move items to cart
- Receive notifications on price drop

8.3 Notifications

The system shall send notifications for:

- Order confirmation
- Shipment update
- Delivery confirmation
- Promotional offers

Channels:

- Email
- SMS
- Push notifications

---

9. Non-Functional Requirements

Category	Requirement
Performance	Page load time should be less than 3 seconds
Scalability	The system shall handle 100,000 concurrent users
Availability	The system shall maintain 99.9% uptime
Security	SSL encryption must be implemented
Compliance	The system shall be PCI-DSS compliant
Backup	Daily automated backups shall be performed

10. Assumptions

- Payment gateway APIs are available.
- Inventory system API is stable.
- Logistics partners provide tracking APIs.

---

11. Constraints

- Budget limit
- 6-month delivery timeline
- Integration dependency on third parties

---

12. Risks & Mitigation

Risk	Impact	Mitigation
Payment failure rate high	Revenue loss	Integrate multiple payment gateways
Inventory sync delay	Overselling	Implement real-time inventory sync
High return rate	Margin impact	Enforce a strict return policy

---

13. Process Flow (Order Lifecycle)

1. User browses products
2. Adds items to cart
3. Proceeds to checkout
4. Inventory validation
5. Payment processing
6. Order confirmation
7. Inventory deduction
8. Warehouse fulfilment
9. Shipping
10. Delivery
11. Return (if applicable)

---

14. Success Metrics (KPIs)

- Conversion Rate > 3%
- Cart Abandonment < 60%
- Average Order Value > $75
- Repeat Purchase Rate > 30%
- Refund Rate < 10%

---

15. Approval

Name	Role	Signature	Date
Business Sponsor	CEO		
IT Head	Technical Owner		
BA Lead	Documentation Owner
